BIOGRAPHY

PEI Z is an outer space based DJ/producer specialising in high BPM emotional damage and questionable life decisions after 3AM. Somewhere between a lover boy and euphoric chaos, his sets have been scientifically proven to make people text their ex and miss their last train home.

From mama's garage to thousand of souls with addictions but appreciate good musics takeovers, PEI Z brings cinematic builds, aggressive energy and the occasional moment of accidental spiritual awakening. Previously spotted sharing lineups with international acts while surviving entirely on airport caffeine, USB anxiety, and bedless sleep

Expect fast HRV, heavy emotions and at least one track that makes the crowd look at each other like they just unlocked a new personality trait.
